

# HOME PROJECT

## HABITAT DIORAMA

As we prepare to conclude our UOI, 'Sharing the Planet' the students will be making a diorama of their chosen animal's habitat. These habitats can be grassland, forest, pond, ocean, desert, and the arctic.

Your child will design and build a diorama display based on the living things which would be found in this habitat, including the animal your child has chosen for their research. In conclusion students will present their diorama and their completed research flip book to the rest of the class. Students can use any box for their diorama as long as the child can carry it themselves, like a shoe box.

**DIORAMA IS DUE ON SUNDAY, MARCH 23rd.**
